

Write Up

This is a restaurant website which was created using HTML,CSS,JS and Bootstrap for better responsive front-end.

This website has three main modules:

1. Home Page:

This page contains most famous dishes with their main ingredients. Here option of subscribing to weekly newsletter is given to the user.

2. About Page:

This page contains a small paragraph about the restaurant and its owner and information about when the restaurant came into existence.

3. Contact Page:

Here on this page we have given a small form in which the user has to give their contact details so the sale person from our team can get in touch with them regarding any query they are having.

Editor used:

1. Visual Studio Code

Additional Plugins Used:

1. SweetAlert2
